

Nenad Marković

AI Product Developer

naucenjak@gmail.com | linkedin.com/in/nenadai

Belgrade, Serbia | Open to relocation to Dubai

AI product developer and founder who built and sold an AI study app with 15,000+ registered users and created an AI training business serving 800+ learners, generating approximately \$70,000 in eight months. Experience spans API-driven products, automated customer journeys, paid acquisition and training.

Core Skills

AI and integration: OpenAI and Anthropic APIs, RAG, speech-to-text and text-to-speech, REST APIs, webhooks

Development: TypeScript, Python, React, Next.js, Node.js, Flutter, Swift, Supabase, PostgreSQL

Growth and training: Meta Ads, Google Ads, direct-response copywriting, sales funnels, email automation, curriculum development

Experience

Evolución Studio | Co-founder and Technical Lead | 2026 - Present

- Lead technical delivery for a small digital studio, covering requirements, architecture, implementation, deployment and client handover.
- Build client websites and conversion pages with Next.js, React and TypeScript, integrating forms, lead capture, analytics and APIs.
- **Case study, Haode Store:** built a full iOS and Android shopping app for a Santiago collectibles retailer from a written spec in 9 days, covering catalogue, cart, checkout, orders, loyalty points and push notifications, with a secure backend to the store's WooCommerce and three Chilean payment providers (Webpay, Mercado Pago, Khipu).

Fluente AI | Founder and Sole Developer | 2026 | [Instagram](#)

- Built and released an iOS language-learning app with an AI conversation tutor, connecting speech recognition, streamed model responses and text-to-speech.
- Implemented authentication, Apple in-app subscriptions, webhooks and event analytics.
- Grew an AI creator Instagram account from zero to 80,000+ followers in approximately one month and used it to promote the app.

Akademus AI | Founder and Sole Developer | 2025 - 2026 | [akademus.ai](#)

- Built an AI study product across iOS, Android and web, grew it to 15,000+ registered users and completed the sale of the business.
- Developed API and backend pipelines that turned scanned material, lesson recordings and text into summaries, quizzes and flashcards; integrated transcription, OCR and retrieval-based chat.
- Owned product design, application development, authentication, subscription billing, deployment and customer support.

AI Milioner | Founder and AI Instructor | 2023 - 2024

- Created and operated an AI freelancing education business serving 800+ learners and generating approximately \$70,000 in course revenue within eight months.
- Designed the curriculum and delivered live sessions, recorded lessons, community support and practical guidance on AI tools and selling services.
- Built an automated sales and delivery funnel connecting advertising, landing pages, registration, evergreen webinars, checkout, course access and email follow-up.
- Managed Meta Ads and Google Ads campaigns with over EUR 20,000 in spend and 10M+ impressions, including targeting, creative production, tracking, sales copy and retargeting.

Education: Theoretical and Experimental Physics, University of Belgrade (2020 - 2023)

Languages: Serbian (native), English (C1)
